One-time, free screening of Marçal Forés' unconventional coming-of-age tale, 'Animals.' Hosted by the director, it will take place at New York's Cinema Village.

An unconventional coming-of-age tale, *Animals* is an intoxicating blend of fantasy and cold reality. Seventeen-year-old high-schooler Pol has stubbornly extended his childhood, aided in no small measure by his opinionated, drums-playing, English-speaking pet teddy bear, Deerhoof. But when he meets alluring new student Icari, the safety of Pol's innocent imagination crumbles as he experiences his first pangs of love and sexual longing. But what will happen to Deerhoof in this new world and can Pol accept his new-found feelings?

Co-starring Martin Freeman (*The Hobbit*, *Sherlock*) as his perceptive teacher, this fresh, inventive take on first love is funny, often bizarre and tragically intense.
