

A Mirror of the Cosmos

Discover the environmental issues in Spanish's Mar Menor, and join a conversation with filmmaker Isabel Carbonell at the screening of this documentary at the National Gallery of Art.

A MIRROR OF THE COSMOS

- Directed by Isabelle Carbonell, 2023, 85 minutes.
- In Spanish with English subtitles. [Watch trailer](#).
- Post-screening discussion with filmmaker Isabelle Carbonell.

A Mirror of the Cosmos explores how the Mar Menor lagoon, considered a paradise in southeastern Spain, is being pushed to the brink of extinction by the climate crisis. Opening with a conversation between the moon and the sea, the documentary explores how the unlikely relationships between invasive blue crabs, nitrates, and mining deposits in Mar Menor deeply intertwine to tell a larger story of capitalism's extractive, cumulative effects on the environment over time.

Presented in conjunction with the *Environmental Film Festival in the Nation's Capital (DCEFF)*, this event is part of the ongoing film series *Art Films and Special Screenings* organized by the National Gallery of Art.
