

Fair Water: A Human Rights and Gender Perspective

This conference addresses the situation of the human right to safe drinking water and sanitation, with a particular focus on the USA, while also exploring the links between water and gender equality.

This workshop gathers experts on water-related issues and innovation from all over the world to address the situation of the human right to safe drinking water and sanitation, with a particular focus on the USA, while also exploring the links between Sustainable Development Goals 6 –Water– and 5 –Gender Equality.

Experts from UCLA, Woodrow Wilson International Center, UNICEF, We are Water Foundation, among others, will join the workshop to share their expertise.

This event is part of the [Fair Water: A Right of All program](#). [View full program](#) (PDF).
